Follows "och interest that follows what I quote Lesar as saying, that Posner admitted to him that the case is not closed:

Insert on Posner admitting the case is not closed - 2

~~Depi-~~ Despite his knowing and admitting that the case is not closed at all, Posner ~~did~~ claimed to David Dudley, as Dudley wrote in the Baltimore City Paper (issue dated 11/26-12/2/1993), "But there is a reevaluation taking place among opinion makers. ... The burden of proof has shifted back. The time is here when we can say, 'Where is the evidence?" (excission in ~~original published report~~ Dudley's)

As Posner knew only too well, the polls said the exact opposite.

His book and the exceptional attention to it, it is worth repeating to each of his knowing ~~untrue~~ true claims and representations, convinced still more people that he and it and the official story are all wrong.
